

**STANDS FIRM
IN EVERY SITUATION**

**STABLE RESULTS—
VISALYS® CORE**

**DUAL-CURING COMPOSITE FOR CORE BUILD-UP
AND ROOT POST CEMENTATION**

VISALYS® CORE – EASY TREATMENT

Dual-curing core build-up & root post cementation material

Visalys® Core – especially for difficult and freehand core build-ups.

EXCELLENT STABILITY

- with very good flow properties at the same time

UNIQUE ACTIVE-CONNECT- TECHNOLOGY

- for optimized adhesive bonding
- for use with common adhesives

DENTIN-LIKE GRINDABILITY

FREE OF BISPHENOL A

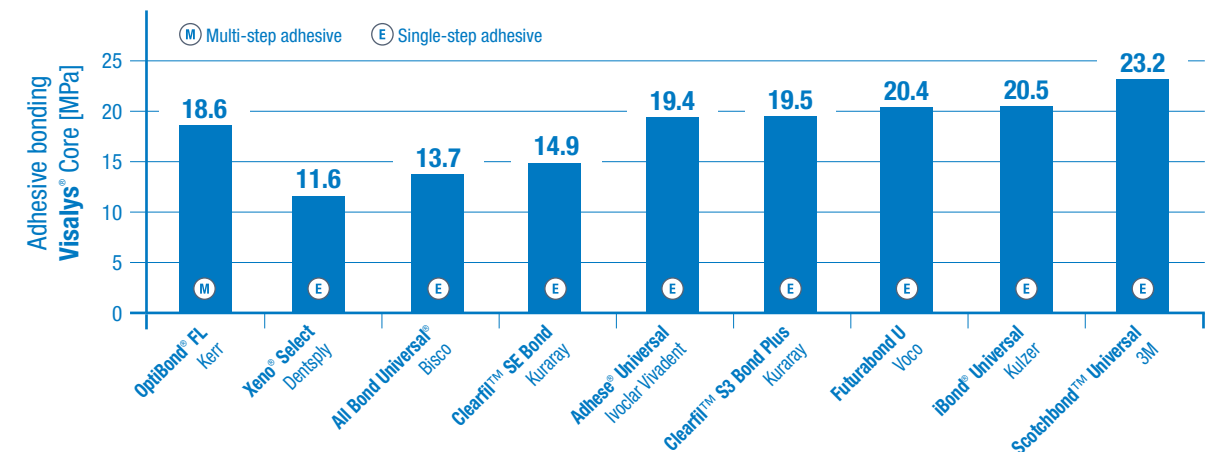

Distinguished by the
experts “The Dental
Advisor”

VISALYS® CORE – STABLE RESULTS

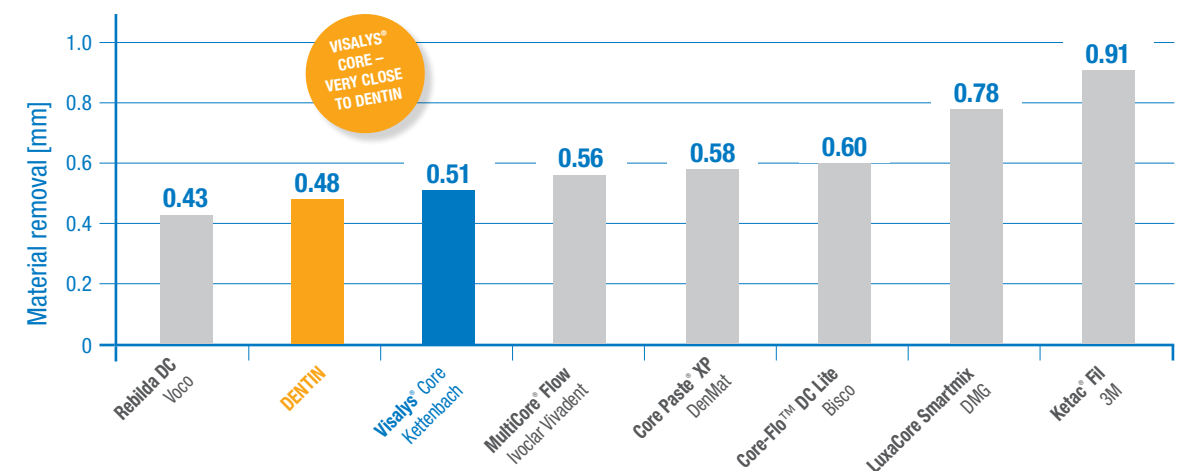

Secure bonding with all relevant adhesives

In-house measurements by Kettenbach, shear adhesive bond, test based on DIN EN ISO 29022.

Visalys® Core achieves the clinically relevant adhesive bond of approx. 10 MPa.

Removal depth when grinding various core build-up materials

Tengku Ibrahim Maulana. Grindability analysis of dental core build-up materials under clinical relevant test procedure. Journal of Medical Materials and Technologies (Thesis Series Edition), Vol 1 No 1, 1-21 (2017)

Visalys® Core can be optimally processed
due to its dentin-like grindability.

VISALYS® CORE – THE RANGE

Visalys® Core			
Intro pack	White Dentin	1 x 9 g (5 mL) automix syringe, 10 grey mixing tips, 5 intraoral tips, 5 endo tips	REF 13866 REF 13865
Normal pack	White Dentin	2 x 9 g (5 mL) automix syringe, 20 grey mixing tips, 10 intraoral tips, 10 endo tips	REF 13860 REF 13861
Normal pack	White Dentin	1 x 45 g (25 mL) cartridge, 20 yellow mixing tips, 20 intraoral tips	REF 13870 REF 13871
